

Paper Helicopters

Cut out the rectangles. You are going to cut on the solid lines and fold on the dotted lines.

First snip all of the solid lines. Then fold up the shaded bottom area at the dotted line. Then fold in flaps D and C so that you have a skinny bottom area, and put a paperclip on it for weight. Finally fold flaps A and B in opposite directions. You can then drop the helicopter from a few feet high and watch it spiral down.
